

APPARATUS FOR ERASING AND CLEANING A WHITEBOARD**Abstract of the Disclosure**

5 The present invention is an apparatus the combines an eraser for a marker board
with a container for cleaning the marker board. This invention has a bracket design to
hold a container of cleaning solution. An opening in the front of the apparatus provides
for the insertion of the container of cleaning solution into the bracket. An adhesive
means on the bottom side of the bracket enables an eraser to be attached to the bracket.
